Burton offers jackets and pants to suit any condition, with warmth zonal mapped using 3M™ Thinsulate™ Insulation or Thermacore™. Dial in your warmth by choosing between versatile shells built for layering, or mid to heavily insulated styles.

WARMTH

SHELL	MID	HEAVY
Maximum versatility with zonal mapped linings for optimal comfort. Simply add extra layers on colder days.	Feature 60G-80G of 3M™ Thinsulate™ Insulation or Thermacore™ for added heat without extra layers.	Maximum warmth with 100G+ of 3M™ Thinsulate™ Insulation, Thermacore™, and/or down and PrimaLoft®.

DRYRIDE fabrics with a higher waterproof/breathability rating are best for most conditions, while our outerwear enhanced with GORE-TEX® fabrics provide the ultimate protection.

WATERPROOFING

GOOD	BETTER	ULTIMATE
With up to 10,000MM waterproofing and 5,000G breathability, even Burton's basic DRYRIDE Durashell™ fabrics keep riders dry.	DRYRIDE Durashell™ fabrics with 10 to 15,000MM waterproofing and 10,000G breathability step up storm performance.	Nothing but GORE-TEX® fabrics and their GUARANTEED TO KEEP YOU DRY® promise.

MEN'S OUTERWEAR

Burton's outerwear line is separated into distinct sub-collections that draw style inspiration from their own unique places. No matter what the weather, where you're going, or your style—we've got you covered.

SEPPE SMITS
BREACH JACKET — BLAZED

[ak] COLLECTION

Combine Burton rider science with GORE-TEX® fabrics for the ultimate in technically powered outerwear.

THE WHITE COLLECTION

Vintage military style with a Woodstock spirit directly driven by Shaun White.

BURTON "HIGH CAMP"

Less is more in a highly functional, minimalist style that works from mountain to street

BURTON "RUSTIC PIONEER"

Inspired by Americana workwear, this modern classic is fueled by a rider-driven mindset.

BURTON "SOUTHSIDE"

Vintage athletic silhouettes and unfussy designs offer a fresh take on timeless looks.

BURTON "HERITAGE"

Inspired by the Burton Archives, timeless design combines with a progressive fit and function.

BURTON X FILSON

Filson's genuine look and trusted fabric woven with proven Burton function.

BURTON TECH APPAREL

Technical fabrics with streetwear appeal for when your riding and lifestyle are cut from the same cloth.

JUSSI OKSANEN
[ak] 3L FREEBIRD JACKET — BLAZED & [ak] 3L HOVER PANT — TRUE BLACK

MEN'S OUTERWEAR

Burton [ak] continues to be the high-performance pioneer with industry-leading innovation accented by style riders wouldn't expect from outerwear of this caliber. State-of-the-art GORE-TEX® fabrics across the line combined with proven materials, minimalist design, and no-nonsense function results in gear that's at the forefront of outdoor function.

MEN'S OUTERWEAR

THE WHITE COLLECTION

With every detail directly driven by Shaun White, his signature collection follows a clean, classic silhouette blended with vintage military style and a Woodstock spirit. The prints and stripes that define the line use Burton's DRYRIDE fabrications that maintain performance on the mountain as well as its appeal.

GREEN MOUNTAIN PROCESS

With the Green Mountain Process, Burton seeks to improve not just the use of sustainable materials, but the process as a whole. The result is a better experience for everyone involved.

Breaking trail with the help of others is the most efficient means to push forward, and when your partners already know the path...even better.

MOUNTAIN DEW

We continue our relationship with our premier GMP partner, Mountain Dew. Through this collaborative process, we are able to transform recycled plastic bottles into pellets that are spun into yarns woven into the fabric of our outerwear.

BLUESIGN

Signifies materials manufactured with methods that meet the highest standards of environmental responsibility, resource conservation, and occupational safety practices.

BIONIC

Bionic® Yarn results in a collection of softgoods woven using a combination of recycled plastic bottles and cotton that creates an entirely new level of durability, comfort, and refined quality.

CHRISTIAN HALLER
HOSTILE JACKET — CAMO BLACK

MEN'S BURTON OUTERWEAR

HIGH CAMP

1 OF 3

High Camp offers minimalist style that easily transitions from snow to street. Technical trims and interior interests create a cohesive language where less truly means more. Clean prints, natural camos, and a subtle play between subdued colors with vibrant pops add to the collection's energy. Burton's DRYRIDE fabrications, GORE-TEX®, and 3M™ Thinsulate™ Insulation keep performance on point.

MEN'S BURTON OUTERWEAR

SOUTHSIDE

3 OF 3

Southside nods to clean design with vibrant color blocking and retro athletic details. Stripes, dots, and edgy prints add punch to classic sport silhouettes that use Burton's DRYRIDE fabrications and 3M™ Thinsulate™ Insulation to maintain performance on and off the mountain. Pop zippers, trims, and interior hits offer a timeless, yet fresh take on outerwear.

MEN'S BURTON OUTERWEAR

HERITAGE

SINCE 1977

Heritage is a collection of outerwear inspired by its original issue, dug from deep within the Burton Archives and brought to life with cutting edge materials, including Burton's DRYRIDE fabrications. Timeless designs and throwback details combine with progressive fit and classic Burton technique for gear that performs long after your board is put away for the day.

MEN'S BURTON

TECH APPAREL

Burton Tech Apparel is developed to work with a rider's lifestyle by incorporating what we've learned on snow into every day garments that take advantage of Burton's DRYRIDE fabrications. Tech jackets, hoodies, softshells, flannels and more for men, women, and kids—it all either has a misty mountain use, or simply reminds everyone that, "yeah, that's right...I ride."

WOMEN'S OUTERWEAR

Burton's outerwear line is separated into distinct sub-collections that draw style inspiration from their own unique places. No matter what the weather, where you're going, or your style—we've got you covered.

[ak] COLLECTION

Combine Burton rider science with GORE-TEX® fabrics for the ultimate in technically powered outerwear.

THE WHITE COLLECTION

Shaun White's classic look infused with a hard rock edge and boutique feel.

BURTON "HIGH CAMP"

East coast vintage captured in a fresh, nautically-inspired style with menswear fabrics.

BURTON "NEON NATIVE"

Vibrant hues and tribal prints balance tech performance details and classic silhouettes.

BURTON "WOODLAND SPIRIT"

Utilitarian and military influence balanced with a softer, more feminine approach.

BURTON TECH APPAREL

Technical fabrics with streetwear appeal for when your riding and lifestyle are cut from the same cloth.

SNUGGIE MUFFIN JACKET — STOUT WHITE / HEATHERS & SASSY PANT — CAT'S MEOW PRINT

THE WHITE COLLECTION

Taken directly from the mind of Shaun White, his signature line for women combines prints, layers, classic stripe variations, and a fresh spin on large scale graphics with a hard rock edge and boutique feel. Patterns both inside and out express the line's attention to subtle detail; while Burton's DRYRIDE fabrications provide the necessary function.

WOMEN'S BURTON OUTERWEAR

NANTUCKET

1 OF 3

Nantucket captures east coast vintage in a nautically inspired twist on style. Simple shapes create a clean foundation for classic color blocking. A variety of textures, leather trims, and bright collegiate stripes mix with traditional menswear fabrics, such as tweeds, checks, and plaids to maintain a preppy feminine vibe. Burton's DRYRIDE fabrications and 3M™ Thinsulate™ Insulation provide the critical cold weather comfort.

NEON NATIVE

2 OF 3

Neon Native balances performance and style by combining vibrant hues with tribal prints and tech materials such as Burton's DRYRIDE fabrications, GORE-TEX®, and 3M™ Thinsulate™ Insulation. Clean shapes and simple cutlines emphasize the technical story. Tonal fabric blocking, vibrant prints, printed tape, and bold linings are some of the elements that drive this strong, energetic outerwear.

CILKA SADAR
PROWESS JACKET — BURNT OLIVE & INDULGENCE PANT — SPIRIT CAMO

WOMEN'S BURTON OUTERWEAR

WOODLAND SPIRIT

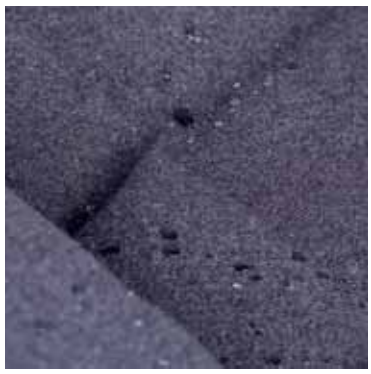

3 OF 3

Woodland Spirit draws from utilitarian and military silhouettes with a more feminine approach. Parka, anorak, and M65 silhouettes are softened with textured prints, rounded shapes, and cozy linings powered by materials from Burton DRYRIDE, GORE-TEX®, and 3M™ Thinsulate™ Insulation. Workwear pocketing on lengthened silhouettes completes this strong and practical style.

WOMEN'S BURTON

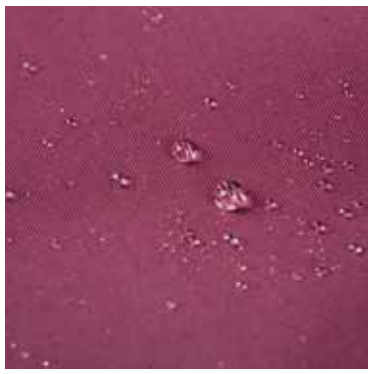

TECH APPAREL

Burton Tech Apparel is developed to work with a rider's lifestyle by incorporating what we've learned on snow into every day garments that take advantage of Burton's DRYRIDE fabrications. Tech jackets, hoodies, softshells, flannels and more for men, women, and kids—it all either has a misty mountain use, or simply reminds everyone that, "yeah, that's right...I ride."

SYMBOL JACKET — BLACK / STONE HUT / BLUE-RAY / ATLANTIC & CYCLOPS PANT — BLUE-RAY

FALL / WINTER 2014

YOUTH OUTERWEAR

Inspired straight from the fabrics, trims, and patterns of the men's collections, Burton Youth Softgoods meet the expectations of younger riders aspiring for greatness, or just a great day. DRYRIDE Durashell™ fabrics keep them dry and low-bulk Thermacore™ insulation keeps them warm for whatever lies ahead.

ILLUSION ONE PIECE — HOT STREAK

FALL / WINTER 2014

MINISHRED OUTERWEAR

Burton's Minishred Softgoods make sure the little ones don't just embrace winter, but thrive in it. Styled to make them proud and armed with DRYRIDE Durashell™ fabrics treated with NEW Aquapel DWR, this outerwear will stand strong from the mountain to recess and back again. And when they grow that inch, Room-to-Grow™ keeps pace.

Outerwear Tech Glossary

Subject: Waterproofing

FABRICATION INNOVATION

ENHANCED WITH GORE-TEX®

The GORE-TEX® diamond represents a commitment to riding in any weather. To satisfy these riders, select men's and women's Burton styles have been enhanced with GORE-TEX® fabric for the ultimate in Guaranteed To Keep You Dry® performance. Add Burton's rider science and you get the ultimate in waterproof, breathable, windproof protection.

All of our GORE-TEX® fabrics include the exclusive GORE-TEX® GUARANTEED TO KEEP YOU DRY® promise.

GORE-TEX®, GORE®, GUARANTEED TO KEEP YOU DRY®, and designs are trademarks of W. L. Gore & Associates, Inc.

MOUNTAIN DEW PROJECT

We've all slammed our share of soda, but the downside to carbonated consumption is all the empties. Our fabric of a new generation taps the reclaimed pile of plastic to create material that reduces our impact. The process transforms recycled plastic bottles into pellets that are spun into yarns woven into the fabric that makes our GMP outerwear collection.

bluesign® APPROVED FABRIC

bluesign® is an independent textile industry standard that signifies materials manufactured with methods that meet the highest standards of environmental responsibility, social responsibility, and resource conservation. Verified through independent audits and supply chain traceability, it is a respected global mark of eco-consciousness that ensures maximum conservation and minimum impact on both humans and the environment.

DRYRIDE®

KEEPING RIDERS DRIER, WARMER, AND ON-HILL LONGER

Our softgoods are designed to work as a system, integrating performance into each component. Because we make outerwear, gloves, Tech Apparel, and First Layer®, we make them work together, ensuring that you will be warm, dry, and protected. Utilizing advanced materials (all stamped with the DRYRIDE seal of approval), rigorous testing, and of course the input of our team, we continue to evolve our fabrics to keep up with snowboardings progression.

DRYRIDE 3L DURASHELL DRYRIDE Durashell™ 3-layer fabrics offer the ultimate in lightweight, high-performance comfort by laminating a waterproof/breathable membrane to the backside of the DWR-finished outer face fabric. The third-layer consists of a lightweight micromesh scrim lining that is bonded directly to the backside of the laminate. This scrim lining protects the laminate, creates a smooth surface against your body, and further accelerates drying by wicking away internal moisture.

DRYRIDE 2.5L DURASHELL With our DRYRIDE Durashell™ 2.5-layer fabric, a waterproof/breathable coating is applied to the backside of the DWR-finished outer face fabric. Then a textured print is applied to shield the waterproof/breathable coating and create a silky smooth next-to-skin surface.

DRYRIDE 2L NANOSHELL The next step in water-repellency, DRYRIDE Nanoshell modifies fabric at a molecular level by permanently bonding hydrophobic "whiskers" to individual fibers. Water-droplets are elevated, causing them to bead and roll off for long-lasting performance that won't break down over time, or alter the fabric's look and feel like typical water-repellent coatings.

DRYRIDE 2L DURASHELL The DRYRIDE Durashell™ 2-layer fabric features technical weatherproofing and breathable properties in a buttery soft yet bomber package. Various insulations and lining systems can be incorporated to fine-tune the overall warmth, comfort, and breathability of the garment.

DRYRIDE Featured exclusively on all minishred outerwear, NEW Aquapel™ DWR provides advanced breathability and protection from rain, sleet, snow, and spills in a durable treatment that maintains softness. All in an eco-friendly, fluorocarbon free package to keep the earth happy.

DRYRIDE ULTRASHELL You'll find DRYRIDE Ultrashell™ fabrics throughout the Burton glove line. Built around the demands of high-energy riding, DRYRIDE Ultrashell fabrics are both bomber and breathable to keep hands dry and protected. Offered in various performance levels and stretch in some styles, with Ultrashell 2-layer coated offering a drier, more breathable level of performance.

DRYRIDE SOFTSHELL We offer DRYRIDE Softshells with various performance characteristics—some for warmth and waterproofing, others for maximum breathability during intense activity. DRYRIDE Softshells with waterproof ratings utilize a membrane laminated to the backside of the fabric, with fleece bonded to the membrane for enhanced warmth and comfort. DRYRIDE Softshells without waterproof ratings are engineered for enhanced breathability by increasing the level of air permeability.

DRYRIDE THERMEX Highly breathable, quick-drying, and warm—DRYRIDE Thermex™ fleece provides core insulation while transporting heat-robbing moisture away from your First Layer® to keep you dry from the inside out. DRYRIDE Thermex fleece is offered in multiple weights and styles, making it easy to dial in your comfort level depending on what the day demands.

DRYRIDE ULTRAWICK Highly breathable and ultra fast-wicking, DRYRIDE Ultrawick™ fabrics use microscopic fibers that pull heat-robbing moisture vapors away from your skin before they sour your pickle. All Ultrawick fabrics are developed with maximum stretch for mobility and use Softlock Seams for a chafe-free ride. Other key tech features can include antimicrobial and wicking finishes.

DRYRIDE MIST-DEFY Water-repellent, quick-drying, and moisture wicking, Burton Tech Apparel with DRYRIDE Mist-Defy performs while maintaining the soft, stretchy, and comfortable benefits of cotton.

DESIGN ELEMENTS

NEW MAPPED WATERPROOFING

On select jackets, fabrics are zonal mapped to focus ramped-up waterproofing, breathability, and durability where each matters most for strategic defense against the elements.

CUFF ELEVATORS

Pull on the hidden ripcord or snap system located on the back of the pant leg to elevate your cuffs and protect them from nastiness and abrasion. Featured on all men's, women's, and youth Burton pants.

ANTI-SCUFF CUFFS

All men's and women's Burton pants now feature cuffs reinforced with durable oxford fabric and contoured shaping for increased abrasion resistance.

DROP HOOD CONSTRUCTION

With the hood attached lower on the collar, this design offers improved comfort, a better fit, and seamless performance when worn with or without a helmet. Featured on jackets across the men's, women's, and youth line.

THUMB GRIP

To keep snow out of your sleeves, place your thumb in this low-profile loop to lock your jacket's cuffs around your gloves or mitts. Featured on all men's Burton jackets.

NEW WIZARD SLEEVE

Extended cuffs are critical on the hill but run a little long in town. Our new quick-cinch shortens sleeves by an inch or two when transitioning from the hill to après or everyday situations and prevents snow-stuffed cuffs when riding.

PLUSH COLLAR

At Jake's request, this contoured collar lined with fleece offers a non-restrictive fit and reduces chin-chafe by removing the seams to create a smooth surface against your face.

SOUND/GOGGLE POCKET

This dual-purpose pocket stashes goggles, snacks, whatever, with a separate mini pocket inside for storing audio devices of all shapes and sizes. Exterior access under the Stormflap™ lets you use the pocket without unzipping the entire jacket.

NO-SNAG VENTS

Quickly and easily open and close your Pit Zips™ and thigh vents without the annoyance of having the zipper get caught in the mesh. Featured on all men's and women's jackets and pants.

SET AND FORGET GHETTO SLITS

Customize your style and your sag with this evolution to our zippered pant cuffs. Set how much you want the bottom hem to open when riding without having it sneak open all the way.

Outerwear Tech Glossary

Subject: Warmth

MAPPED OUTERWEAR SYSTEM

Trail Mapping is a fancy name for Burton's strategically designed outerwear lining and insulation systems. Get focused breathability where it matters most and variable levels of insulation to keep warmth efficient and effective.

TRAM PACKAGE MAPPING

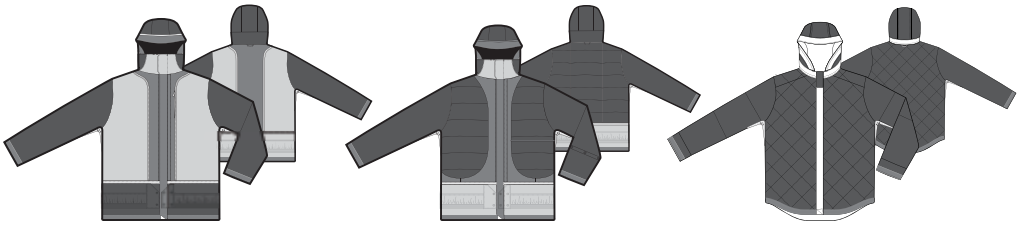

Premium lining materials with select styles also featuring zonal engineered 3M™ Thinsulate™, X-STATIC® antimicrobial, and/or down fill insulations plus smart linings for the highest level of systematic climate control.

QUAD PACKAGE MAPPING

Strategically designed lining system for maximized comfort, mobility, and heat retention. Powered by 3M™ Thinsulate™ and X-STATIC® antimicrobial insulations in select styles.

DOUBLE PACKAGE MAPPING

Versatile performance with lining materials strategically mapped to maximize breathability, warmth, and comfort. Powered by 3M™ Thinsulate™ Insulation in select styles.

OUTERWEAR CONDITIONS RATINGS

To clearly and easily communicate a piece's potential, we have designated every men's, women's, and kids' jacket and pant with a Conditions Rating.

ALL-SEASON CONDITIONS

The most versatile, ranging from non-insulated shells to lightly insulated styles with up to 40G of 3M™ Thinsulate™ or Thermacore™ insulation Simply add extra layers on colder days.

MID-WINTER CONDITIONS

Focused, low-profile warmth backed by rider science. These pieces feature 60G-80G of 3M™ Thinsulate™ or Thermacore™ insulation for added heat without extra layers.

SUB ZERO CONDITIONS

Serious warmth for the absolute coldest conditions. These pieces protect with 100G+ of 3M™ Thinsulate™ or Thermacore™ insulation and/or down fill and PrimaLoft®.

LININGS

The secret to staying warm and comfortable is staying dry. That's why we add a variety of incredibly versatile lining materials to enhance our outerwear's ability to pull heat-robbing moisture away from your body. Check out the 100% recycled linings in all Burton GMP styles.

NEW HEAT CYCLE LINING

The NEW state-of-the-art carbon fiber heat-activated lining is your best friend for improved warmth through reflective body heat retention and maximum breathability.

NEW HEATHERED KNIT ANTIMICROBIAL LINING

Focuses performance where your body generates the most sweat to keep the jacket smelling fresh while eliminating particles that clog the outer shell membrane, leading to enhanced breathability for the life of the jacket.

MESH LINING

100% polyester mesh linings are key in a 2-layer jacket's ability to breathe and wick away heat-robbing moisture. It also protects the coating or lamination to ensure top-level waterproofing and breathability season after season.

FLEECE LININGS

Brushed fleece, microfleece, waffle fleece, and super soft Sherpa fleece linings combine warmth and the ability to keep you dry in a low-bulk package. Perfect for riding in milder weather or whenever you don't feel like adding layers.

TAFFETA LINING

Taffeta offers a crisp, high-end feel that is often woven using a mix of silk and synthetic fibers. Its unique hand feel and sheen make it ideal for printing and embossing, and like all Burton linings, it wicks and breathes easy to keep you dry from the inside out.

FLANNEL LINING

No half-assed over-printing here. For the real deal flannel look and feel, we developed a yarn-dyed fabrication that utilizes soft, quick-drying materials to enhance warmth and comfort.

WAFFLE KNIT LINING

Dries quickly and wicks away heat-robbing sweat while trapping pockets of heat to help keep a barrier of warmth against your body.

INSULATIONS

3M Thinsulate INSULATION

Burton team riders require ultimate mobility and comfort in all conditions. With 3M™, Burton found a progressive solution through a blend of 3M™ Thinsulate™ Insulaton—constructed from unique, high-loft microfibers for increased warmth with less bulk; proving there's substance to the cliché: less is more.

X-STATIC®—THE SILVER FIBER®

By bonding a layer of pure silver to the insulating fibers, X-STATIC® antimicrobial insulation provides added defense to keep outerwear smelling fresh. It also keeps the outerwear's fabric pores unclogged from bacteria and breathable for the life of the jacket. Strategically placed in the arm pits of select men's and women's Burton jackets.

DOWN FILL INSULATION

To measure its fill power, one ounce of down is placed in a cylinder, compressed, and allowed to fully loft. The cubic inches of the lofted down represent its fill power. What you really need to know is that the higher the number, the higher the insulating properties, and the warmer you will feel.

THERMACORE

Developed for superior warmth-to-weight, Thermacore™ cranks the heat without limiting mobility. We offer Thermacore in a variety of weights, and in select styles fine-tune the amount of insulation in the body, sleeves, and hood for focused warmth and breathability.

SEAM TAPE

Sealing the seams and stitch holes on our jackets and pants with lightweight seam tape creates an impenetrable barrier against wind and water droplets.

FULLY TAPED SEAMS

Every seam in the jacket and pant is taped to create the ultimate foul weather seal. Featured on select Burton jackets, and ALL Burton pants.

CRITICALLY TAPED SEAMS

Major seams are taped to keep the elements out and add strength in areas that receive the most stress.

Outerwear Tech Glossary

Subject: Men's and Women's Fits

GET IN WHERE YOU FIT IN

Our men's and women's outerwear comes in a variety of distinct fits—all tailored around the movements of riding for total protection from wind, wet, and wacky style.

MEN'S FITS

SIG FIT JACKETS

Our tried-and-true fit—built with room for layering, without being overly baggy. Sleeves designed with a bit of extra length to fit over your gloves and keep snow out when strapping into your bindings.

SIG FIT PANTS

Classic, rider-focused articulated fit, built with room to sag and layer underneath, without being overly baggy. Based on rider feedback, leg circumference is slightly narrower from thigh to cuff without looking pinner.

MID FIT JACKETS

Bridges the gap between our classic Sig Fit and street-influenced Slim Fit. Slightly longer and more tailored without being wider for a jacket that functions and looks good on snow and street.

MID FIT PANTS

Bridges the gap between our classic Sig Fit and street-influenced Slim Fit. With a slightly longer inseam, the silhouette is narrower from hip to cuff with slight tailoring at the knee for proper articulation and rider-friendly function.

SLIM FIT

SLIM FIT PANTS

Tighter and more tailored when compared to Sig Fit with a shorter rise and narrower waist, hip, and thigh area. Enough room in the cuffs to accommodate your boots.

TWC FIT

The White Collection features Shaun White's own unique take on our Sig and Slim Fit. A little longer here, a bit tighter there—the fit of each jacket and pant is tailored specifically around his style.

WOMEN'S FITS

BOYFRIEND FIT JACKETS

Sleeves and body are slightly longer than Sig Fit with a body circumference that is a tad wider and straighter through the waist for a more progressive, relaxed look. Exclusive to jackets.

SIG FIT JACKETS

Our tried-and-true fit, built for riding but with feminine cutlines. Sleeves feature a bit of extra length to fit over your gloves and keep snow out when strapping into your bindings.

SIG FIT PANTS

Classic, rider-focused articulated fit, built with room to sag and layering underneath, without being overly baggy. Relaxed from thigh to cuff, the leg comes in slightly at the knee. Like your jeans, the waist and hip sit below your belly button.

SLIM FIT JACKETS

More tailored and with a slightly shorter body length than Sig Fit. The shoulder, sleeve, and body are narrower to have more of a streetwear appearance, while still allowing room for layering.

SLIM FIT PANTS

Tighter all around without limiting rider mobility thanks to stretch materials. The leg appears more "flared" than any other pant, with enough room in the cuffs to accommodate your boots. A smaller waist, hip, and thigh are balanced by a slightly longer inseam.

TWC FIT

The White Collection has its own unique fit. Designed to offer a more tailored look, TWC jackets and pants are slimmer, straighter, and longer than Burton Women's Sig Fit.

Subject: Tech Apparel

Burton Tech Apparel features every day garments that take advantage of technical, mountain-proven materials.

MEN'S FITS

[ak] FIT

A performance oriented, articulated fit with cutlines and patterning engineered to mimic the body's natural flex while riding and hiking. The result is a higher degree of mobility that enhances the function-first design and style of [ak].

WOMEN'S FITS

[ak] FIT

A performance oriented, articulated fit with cutlines and patterning engineered to mimic the body's natural flex while riding and hiking. The result is a higher degree of mobility that enhances the function-first design and style of [ak].

FABRICS

AIRTECH®

Developed to meet the demands of high-energy days in harsh conditions, AirTech® fabric combines burly wind and waterproofing with enhanced breathability. Featured on select men's and women's Burton Rainwear and Softshell jackets.

BONDED FLEECE

Joining a face or shell fabric to a fleece backing allows us to combine the comfort and style characteristics of a variety of fabrics—some with enhanced performance properties, others for style. Look for a variety of bonded fabrics throughout the Burton Tech Fleece collection.

SWEATER FLEECE FABRICS

Looks like a sweater, functions like a tech fleece. Get quick-drying, breathable warmth without the itchy feel and moth ball smell.

YARN-DYED FABRICATION

No half-assed over-printing here. For the real deal flannel look and feel, we developed a yarn-dyed fabrication that utilizes the quick-drying and stink-fighting properties of DRYRIDE Ultrawick™ fabric. Select flannels go further with stretch for better mobility and heavier brushing for added warmth.

LININGS

MESH LINING

100% polyester mesh linings are key in a 2-layer jacket's ability to wick away heat-robbing moisture. It also protects the coating or lamination to ensure top-level waterproofing and breathability season after season.

FLANNEL LINING

No half-assed over-printing here. For the real deal flannel look and feel, we developed a yarn-dyed flannel fabrication that utilizes soft, quick-drying materials to enhance warmth and comfort.

TAFFETA LINING

Taffeta offers a crisp, high-end feel that is often woven using a mix of synthetic fibers. Its unique hand feel and sheen make it ideal for printing, and like all Burton linings, it wicks and breathes easy to keep you dry from the inside out.

INSULATION

3M Thinsulate INSULATION

Burton team riders require ultimate mobility and comfort in all conditions. With 3M™, Burton found a progressive solution through a blend of 3M™ Thinsulate™ Insulaton—constructed from unique, high-loft microfibers for increased warmth with less bulk; proving there's substance to the cliché: less is more.

THERMACORE

With superior warmth-to-weight, Thermacore™ cranks the heat without limiting mobility. We offer Thermacore in a variety of weights, and in select styles fine-tune the amount of insulation in the body, sleeves, and hood for focused warmth and breathability.

DOWN FILL INSULATION

To measure its fill power, one ounce of down is placed in a cylinder, compressed, and allowed to fully loft. The cubic inches of the lofted down represent its fill power. What you really need to know is that the higher the number, the higher the insulating properties and the warmer you will feel.
